TenantDetective™, Plow Networks' Microsoft 365 optimization application, breaks down your Microsoft licensing in a comprehensive way that helps you make the right decisions--and save money. It's a simple, safe, and risk-free way for your business to save on your Microsoft 365 licenses. Here's what you need to know:

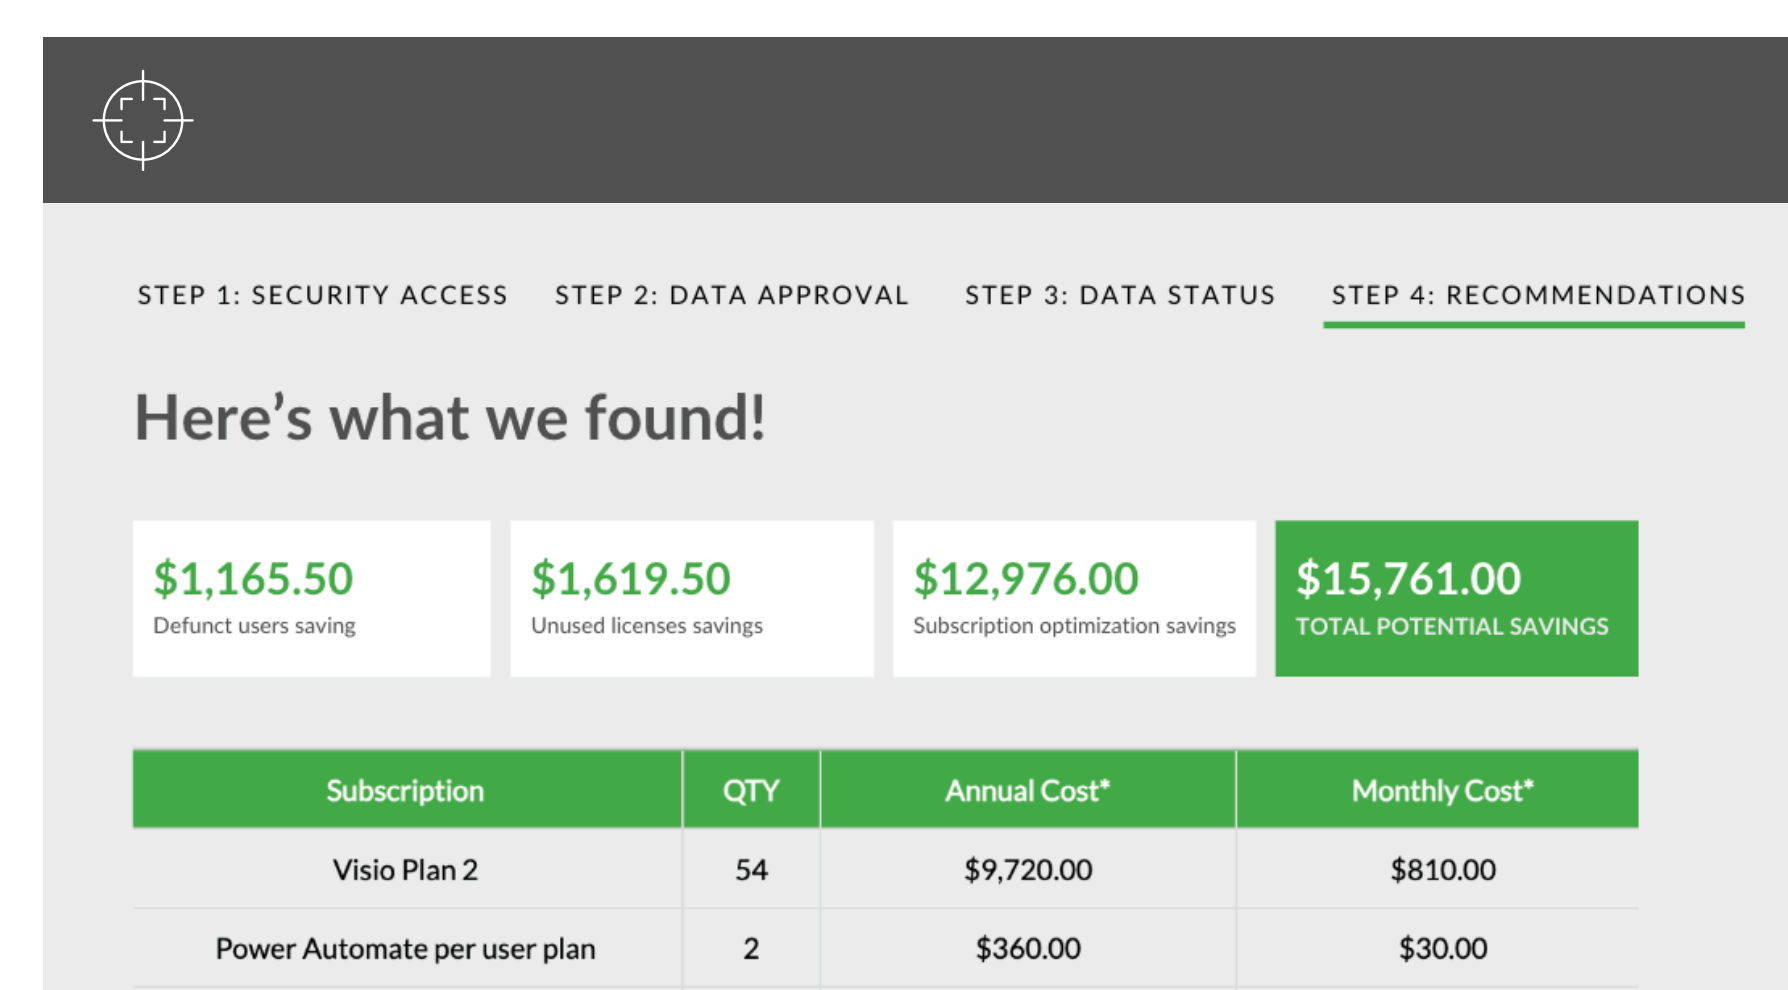

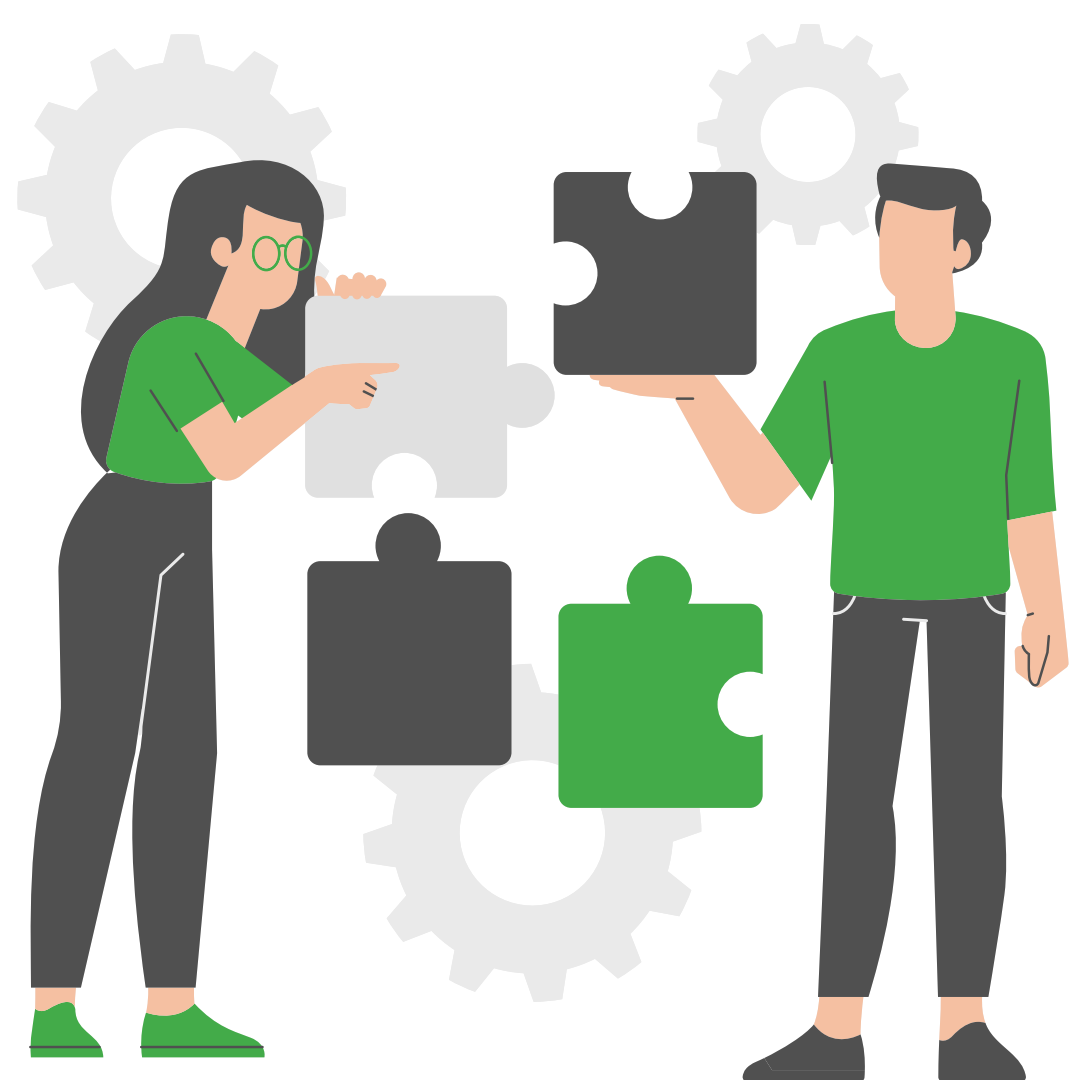

1. We don't store your data

Your organization must explicitly grant us read-only access to your Microsoft tenant, and we will disable that access after 30 days unless you agree to tell us not to do so.

2. We don't sell your data

We will never sell your data and purge any data gathered from our process if you elect not to do business with us.

3. We ensure license compliance

Your agreement with Microsoft requires that you comply with their licensing rules; however, there are multiple ways to deploy subscriptions that work technically but violate your Microsoft Agreement. TenantDetective™ identifies these issues and allows you to resolve them...before Microsoft comes calling...

4. We're here to help

Optimizing your Microsoft 365 licenses--and avoiding over-buying--is basically impossible to do without software help. TenantDetective™ was purpose-built for this--our goal is help you manage your licenses and only buy what you need.

5. We use Microsoft-Verified Service Principals

TenantDetective™ leverages Microsoft-verified service principals to ensure robust authentication and authorization mechanisms. By utilizing Microsoft's verification process, we guarantee the integrity and security of our service principals and you can have peace of mind knowing that your interactions with our application are safeguarded by stringent authentication protocols endorsed by a trusted industry leader.
